

The Six Trumps[®] Workshop Postcards

**Postcards for Participants
for the Data Hunt and Talking Cards Activities**

**From: *Using Brain Science to Make Training Stick*
Author: Sharon Bowman**

Instructions: The postcards are printed four to a page, to be cut into four separate cards. The first page contains the postcard front and the second page contains the postcard back. When printed, the postcards have the six learning principles on one side (to be filled in by the participants during the Data Hunt activity) and the note-taking space on the other side (to be used during the Talking Cards activity). Each participant should have one postcard that is printed on both sides.
